

Edmart Abon

FULL STACK DEVELOPER | DEVOPS ENGINEER

edmartabon@gmail.com | 0905-858-0524 | <https://edmartabon.github.io>

PROFESSIONAL SUMMARY

Full Stack Developer and DevOps Engineer with 11+ years of experience delivering SaaS platforms, internal systems, and client-facing web applications from database design to production deployment. Strong background in PHP, Laravel, Node.js, Express.js, React, Next.js, Vue.js, REST API development, relational database design, Dockerized deployments, CI/CD, AWS, GCP, and DigitalOcean. Experienced in multi-tenant SaaS architecture, payment gateway integrations, database optimization, Redis caching, and release workflows for scalable, maintainable, and production-ready systems.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, SQL

Backend: Laravel, Node.js, Express.js, REST APIs, CMS platforms, payment gateway integrations

Frontend: React, Next.js, Vue.js, Gatsby.js, responsive UI development

Databases and Caching: MySQL, PostgreSQL, MongoDB, Redis, schema design, query optimization

DevOps and Cloud: Docker, Kubernetes, CI/CD, AWS, GCP, DigitalOcean, server operations

Testing and Quality: Jest, debugging, troubleshooting, production support, data validation

PROFESSIONAL EXPERIENCE

Lead Software Developer | VetCliq

Remote | June 2025 - Present

Tech: Laravel, PHP, Express.js, Node.js, React, Next.js, MySQL, Redis, Docker, AWS

- Lead end-to-end development of a multi-tenant SaaS platform for veterinary clinics, covering backend services, frontend applications, database design, and deployment workflows.
- Architect and maintain scalable backend services using Laravel and Node.js/Express to support modular, high-availability features across multiple tenants.
- Design and optimize MySQL schemas, queries, and Redis caching strategies to improve application performance, responsiveness, and system efficiency.
- Build responsive and reusable React and Next.js interfaces to improve maintainability and deliver a smoother user experience across the platform.
- Manage Dockerized deployments, CI/CD pipelines, and server operations to support stable releases and efficient development workflows.
- Implement automation and AI-assisted features that improve clinic operations and support smarter veterinary workflows.

Senior Developer | WeCreate

Remote | April 2023 - June 2025

Tech: Laravel, Node.js, PostgreSQL, MySQL, Express.js, React, Vue.js, Gatsby.js, Next.js, AWS, GCP, DigitalOcean, CI/CD

- Served as a lead technical contributor across client projects, owning delivery from database structuring and backend development to frontend implementation, deployment, and CI/CD.

- Designed and optimized PostgreSQL and relational database schemas for scalable, reliable, and high-performing applications.
- Developed backend services, APIs, and integrations using Laravel, CMS platforms, and Node.js/Express, ensuring maintainable production-ready systems.
- Built frontend applications with React, Vue.js, Gatsby.js, and Next.js, translating requirements into responsive and reusable interfaces.
- Managed deployments, release processes, and development environments to support smooth delivery and system stability across client projects.
- Provided troubleshooting, maintenance, and technical problem-solving throughout the development lifecycle for secure and reliable production environments.

Backend Developer | Collabera

Makati City | February 2022 - April 2023

Tech: API development, payment gateway integrations, encryption, authentication, testing, debugging

- Collaborated with banking partners to integrate payment gateways into client applications, delivering secure and seamless payment processing experiences.
- Developed robust APIs and implemented industry-standard encryption and authentication to help safeguard sensitive financial data.
- Supported regulatory compliance requirements through careful testing, debugging, and reliability checks for integrated payment solutions.

Full Stack Developer | FuseSoftware

Melbourne, Australia | December 2020 - February 2022

Tech: Internal applications, database management, workflow automation, collaboration tools

- Designed and developed an internal application that streamlined developer workflows by automating repetitive tasks and improving collaboration.
- Collaborated with cross-functional teams to gather requirements and implement features that enhanced productivity and efficiency.
- Used database management techniques to store and retrieve data efficiently for seamless application performance.

Backend Developer | Botkeeper

Balanga, Bataan | December 2017 - December 2020

Tech: REST APIs, accounting platform integrations, data transformation, data validation

- Designed and implemented RESTful APIs for seamless data transfer between accounting platforms.
- Ensured data integrity and accuracy through data transformation and validation processes.
- Collaborated with cross-functional teams to integrate APIs into user interfaces and support platform workflows.

Full Stack Developer | Bizwex

Balanga, Bataan | March 2014 - December 2017

Tech: Node.js, Express.js, PHP, Laravel, React.js, Vue.js, REST APIs, database design

- Developed RESTful APIs using Node.js and Express.js for client-facing applications.
- Built scalable and secure web applications using PHP and Laravel.
- Created responsive and interactive user interfaces using React.js and Vue.js.
- Integrated third-party APIs and services into existing systems to extend application capabilities.
- Designed and implemented database schemas to support client application requirements.
